**Eating Fish from the Detroit River**

**Fish are part of a healthy diet.**
Most fish are safe to eat. But some fish have high amounts of chemicals in them. Eating some types of fish too often can cause health problems, especially for women and children.

**Trim and Cook Fish**
Trimming and cooking off the fat can remove up to half the chemicals. Cook fish on a rack or grill.

**Better Spots for Catching Catfish**
These lakes have been stocked with catfish. The catfish in these lakes have less chemical contamination than those in the Detroit River:
- Belleville Lake, Wayne County
- Newburgh Lake, Wayne County
- Pontiac Lake, Oakland County
- Stony Creek Impoundment, Macomb County
- Ford Lake, Washtenaw County
